

### Why I Love my Summer Job

Hey, my name is Abbey Ben-Sedonu and I work in the Financial Services branch at the Ministry of Health. The Ministry of Health provides high-quality health care to the people of Saskatchewan through the use of an efficient, and patient- and family-centered health care system. The financial services branch oversees the development of the Ministry's annual budget and acts as a liaison to the Ministry of Finance and Provincial Auditor. We also implement health-related financial and administrative policies as well as manage centralized services such as forecasting, payment and procurement services.

setting up of monthly and yearly goals in which everyone contributes to achieve. Furthermore, there is always something for me to learn. Since my time here, there has not been a day that I do not find something new to work on or learn. I think this contradicts the public stigma that claims that most financial jobs are boring or always the same.

As a Revenue Clerk at the financial services branch, I get to communicate with clients especially on setting up or inquiring about invoices. Providing the citizens of Saskatchewan with the appropriate solution and assisting them to pay their bills especially when it is often stressful for clients to pay their medical bills, is also a reason why I love my job.

I love my summer job because it's fun, educative and engaging. It gives me the chance to collaborate with various health departments and an opportunity to make a difference, in Saskatchewan Health Care.
